### Business Analysis

#### • **5-Day Business Analysis Bootcamp—June 12–16**

Business analysts bridge the “understanding gap” between organizations and technology, and the demand for good business analysts is increasing every day. In this 5-day bootcamp, learn the skills, techniques, and tools needed to be a successful business analyst. You will learn to:

- Understand and define an organization's needs
- Gather the information needed to clearly define business requirements
- Document requirements for use by all stakeholders
- Analyze, verify, and validate requirements
- Create a framework for successful requirements management and communication

Professional and Continuing Studies
