Continuing Dental Education Summer Symposium

July 22–26, 2019

Atlantic Sands Hotel and Conference Center
Rehoboth Beach, Delaware

The Continuing Dental Education Summer Symposium combines quality education with a great beach location. If you are a general dentist, dental hygienist, dental assistant or dental student take advantage of this continuing education program in a relaxed, collegial environment. Whether you are traveling alone or with family, Rehoboth Beach offers the ideal location for our Summer Symposium. Attractions abound, from the famous boardwalk, to the beautiful beaches; great shopping; tennis, golf and other recreational opportunities; arcades and amusements; and a nearly endless variety of restaurants and eateries. Rehoboth Beach is approximately a three-hour drive from Baltimore, Philadelphia or Washington.

Excellent programs and speakers. Great beach location!

Credit

Participants will be awarded 4.0 credit hours for each seminar. To receive credit, participants must sign in at the seminar, attend the seminar in its entirety, and complete an online evaluation. Upon completion of the evaluation, participants will be able to download and print their attendance certificates. Please contact your state examining board to see if the courses offered at this symposium are approved for credit.

(AGD PACE logo) National Dentex Corporation is designated as an Approved PACE Program Provider by the Academy of General Dentistry (AGD). The formal continuing education programs of this program provider are accepted by AGD for Fellowship, Mastership and membership maintenance credits. Approval does not imply acceptance by a state or provincial board of dentistry or AGD endorsement. The current term of approval extends from 10/1/2017 to 9/30/2021. Provider ID# 211838

This continuing education activity has been planned and implemented in accordance with the standards of the ADA Continuing Education Recognition Program (ADA CER-P) through joint efforts between National Dentex and the University of Delaware.

Program Schedule

Monday, July 22–Friday, July 26, 2019

Monday, July 22

- 7:30 a.m. Registration and Continental Breakfast
- 8 a.m.–noon **Do You Think You're Getting a Good Night's Sleep, and What Does This Have to Do With Dentistry?**
Erika Mason, DDS

Tuesday, July 23

- 7:30 a.m. Registration and Continental Breakfast
- 8 a.m.–noon **Prioritizing Patient Safety: Reducing Risk through Closed Claim Analysis**
Julie Goldberg, DDS

Wednesday, July 24

- 7:30 a.m. Registration and Continental Breakfast
- 8 a.m.–noon **Clinical Dental Pharmacology Update 2019**
Harold L. Crossley, DDS, MS, PhD

Thursday, July 25

- 7:30 a.m. Registration and Continental Breakfast
- 8 a.m.–noon **Safety and Simplicity in Root Canal Instrumentation: Myths, Metal and Motion**
Brad Trattner, DDS

Friday, July 26

- 7:30 a.m. Registration and Continental Breakfast
- 8 a.m.–noon **Expedited Excellence: What's New That Can Make You Faster and Better**
Joshua Austin, DDS, MAGD

Monday, July 22 • 8 a.m.–noon

Do You Think You're Getting a Good Night's Sleep, and What Does This Have to Do With Dentistry?

Erika Mason, DDS

What is all the hype about obstructive sleep apnea (OSA)? This session presents why sleep is so important for your overall health. After hearing this lecture, you will see things differently when looking in someone's mouth. Light bulbs will go off when you review patients' medical histories, medications, surgical history and social history, and the "dots" will start connecting. You will never look at sleep and breathing the same!

This presentation is appropriate for dentists, dental hygienists, dental assistants, dental students and administrative staff.

At the conclusion of this lecture, participants will be able to:

Awareness:

- Identify the anatomical findings that provide clues for a patient's risk of having obstructive sleep apnea (OSA)
- Understand the correlation of certain medications and medical conditions that may indicate OSA risk
- Gain knowledge of the various questionnaires that help identify OSA risk
- Understand your obligation to screen patients for OSA

Diagnostics:

- Identify how the dental practice can help facilitate patients' OSA diagnosis
- Understand the various types of testing relevant for OSA diagnosis
- Gain knowledge of what a sleep study looks like and what it reveals about a patient's sleep

Financials:

- Identify what codes and documents to use in filing for medical insurance coverage
- Understand necessary documentation for "audit-proof" medical claim payment
- Gain knowledge of the medical insurance environment, compared to dental insurance
- Understand commercial insurance vs. Medicare coverage and how they differ

Treatment:

- Identify the various treatment options for OSA
- Understand American Academy of Sleep Medicine (AASM) and American Academy of Dental Sleep Medicine (AADSM) guidelines
- Gain knowledge of oral appliance therapy (OAT) options and how they work
- Identify what it takes to make OAT successful in your practice

Erika Mason, DDS, built and maintained a highly successful general and cosmetic dental practice in Richmond, Virginia, for over 30 years. Since 2016, she has been exclusively treating

patients who suffer from obstructive sleep apnea (OSA) through her business, Sleep Better Virginia.

Dr. Mason holds diplomate certifications with the American Board of Dental Sleep Medicine (ABDSM) and the Academy of Clinical Sleep Disorder Disciplines (ACSDD), making her one of only 35 “double diplomate” dental sleep medicine experts in the country. Dr. Mason was instrumental in helping to establish the Virginia Academy of Dental Sleep Medicine (VADSM) and has since served as a past president and an active board member. She is presently serving a three-year term as the dental sleep medicine board member of the Virginia Academy of Sleep Medicine (VASM). She has had the opportunity to help with an oral appliance therapy (OAT) training initiative of active-duty military dentists. Dr. Mason is passionate about sleep health and educating other dental professionals on this important topic.

This session is presented with sponsorship by ProSomnus Sleep Technologies, Itamar Medical and Inside Self Storage.

| Health Being Made Simple

Tuesday, July 23 • 8 a.m.–noon

Prioritizing Patient Safety: Reducing Risk through Closed Claim Analysis

Julie Goldberg, DDS

In this session, closed dental malpractice claims are analyzed to identify how and when dentists and their staffs can implement risk management and ethical principles to enhance patient safety and reduce untoward outcomes. Topics include extractions and implants, failure to diagnose, nerve injury, and patient selection and management considerations.

This presentation is appropriate for dentists, dental hygienists, dental assistants, dental students and administrative staff.

At the conclusion of this lecture, participants will be able to:

- Apply clinical risk management strategies to improve patient safety, mitigate associated risk factors and reduce untoward outcomes and malpractice claims
- Implement strategies to help prevent failure-to-diagnose allegations
- Recognize the potential effect technology and applied risk management can have on mitigating and managing nerve injury

DISCLAIMER: This presentation is intended to further the education and scholarship of the dental community by providing information regarding risk management topics. Because federal, state and local law varies by location and situation, and changes over time, nothing in this presentation is intended to serve as legal advice or to establish any standard of care. Legal advice, if desired, should be sought from competent counsel in your state. This presentation does not modify the terms and conditions of the Fortress Insurance Company Professional Liability Policy. Please refer to the Fortress National Insurance Company, Professional Liability Policy for these terms and conditions.

Julie Goldberg, DDS, is the education coordinator at Oral and Maxillofacial Surgeons National Insurance Company (OMSNIC) and Fortress Insurance

Company. Dr. Goldberg received her dental degree from the University of Illinois and is a licensed dentist in both Illinois and Florida. She is a Chicago-area native who has been in private practice in Illinois, as well as in the Fort Lauderdale, Florida, area, and currently maintains membership with the ADA as well as the Chicago Dental Society. She brings her clinical dental experience and knowledge to the patient safety and risk management department.

Wednesday, July 24 • 8 a.m.–noon

Clinical Dental Pharmacology Update 2019

Harold L. Crossley, DDS, MS, PhD

This presentation covers the most recent changes to managing orofacial infections and controlling post-operative dental pain, including a definitive discussion on antibiotic prophylaxis for subacute bacterial endocarditis (SBE) and patients with orthopedic prosthesis undergoing dental procedures. Medication-induced osteonecrosis of the jaw in patients taking the newer drugs for osteoporosis will also be discussed. Are monoclonal antibodies here to stay? Lastly, new evidence that the

administrative staff.**

NSAIDs-plus-acetaminophen combination for treating post-operative dental pain is gaining popularity, not only among dental professionals but also with our colleagues in the orthopedic specialty, is provided.

At the conclusion of this lecture, participants will be able to:

- Name the antibiotics used to prevent SBE
- Name the most popular medications used to treat and prevent osteoporosis
- Identify the side effects of monoclonal antibodies that impact on dental treatment
- Identify the antibiotic of choice in a healthy ambulatory population who present with an orofacial infection

Harold L. Crossley, DDS, MS, PhD, is professor emeritus at the University of Maryland School of Dentistry. A native of Rhode Island, Dr. Crossley received a bachelor of science in pharmacy from the University of Rhode Island in 1964. He later was awarded master of science (1970) and doctoral degrees (1972) in pharmacology. The University of Maryland

School of Dentistry in Baltimore awarded Dr. Crossley his DDS in 1980. His role as liaison between the classroom and his dental practice produced a practical approach to understanding the pharmacology of drugs used in the dental office. Dr. Crossley has co-authored a number of articles and four books dealing with a variety of topics within the field of pharmacology. Dr. Crossley serves on the Maryland State Dental Association's Well-Being Committee and served on the Governor's Commission on Prescription Drug Abuse. He is an active member of Phi Kappa Phi, Omicron Kappa Upsilon Honorary Dental Society, the American College of Dentists and the International College of Dentists and an honorary member of the Thomas B. Hinman Dental Society. He was the recipient of the 2008 Gordon Christensen Lecturer Recognition Award, presented by the Chicago Dental Society, and the 2012 Award of Distinction, presented by the Academy of Dentistry International, for his efforts in continuing dental education. He has been a consultant for the U.S. Drug Enforcement Administration and other law enforcement agencies since 1974. Drawing on this unique background, Dr. Crossley has become nationally and internationally recognized as an expert on street drugs and chemical dependency as well as the clinical pharmacology of dental drugs.

Thursday, July 25 • 8 a.m.–noon

Safety and Simplicity in Root Canal Instrumentation: Myths, Metal and Motion

Brad Trattner, DDS

Nearly 25 years after the introduction of nickel-titanium rotary files to endodontics, we've learned much about the clinical strengths and limitations of these great instruments. As a result of recent improvements in metallurgy, enhanced designs and innovative rotary file motions, we now need to understand how these changes affect clinical instrumentation. Furthermore, we must take advantage of these improvements to create an instrumentation protocol that combines safety with simplicity.

As a result of recent advances in metallurgy, we now have both heat-treated and non-heat-treated rotary files. They each possess different properties and both have indications for use as well as limitations. We have developed a blended technique that combines the advantages of both heat-treated and non-heat-treated files into one awesome endodontic technique!

You will learn how to improve your instrumentation predictability while dramatically reducing instrument separation. Furthermore, a simple yet effective obturation method will be introduced that combines the latest in material science with endodontic synchronicity for passive, bonded root canal obturation.

At the conclusion of this lecture, participants will be able to:

- Learn how rotary file design influences instrumentation safety and efficiency
- Discover the most effective instrument motions available for shaping root canals and their advantages and limitations
- Fully understand the need to combine the latest technology with long established, evidence-based endodontic principles

Bradley Trattner, DDS, is a diplomate of the American Board of Endodontics and a member of the College of Diplomates. He received both his DDS and Certificate in Endodontics from the University of

Maryland School of Dentistry. He holds staff positions at Sinai Hospital and teaches endodontics in the divisions of Endodontics and Advanced Education in General Dentistry at the University of Maryland School of Dentistry. He has maintained a private practice in endodontics

This presentation is appropriate for dentists, dental hygienists, dental assistants, dental students and administrative staff.

This session is presented with sponsorship by Real World Endo.

in Baltimore for over 25 years and has been voted “Baltimore’s Best” endodontist by Baltimore Magazine since 2002. He is a past president of the Maryland Association of Endodontists, Alpha Omega Dental Fraternity and the University of Maryland School of Dentistry Alumni Board, as well as a member of the Pierre Fauchard International Honor Academy, and is a fellow of the American College of Dentists. He has lectured extensively nationally and is a clinical advisor and certified lecturer for Real World Endo.

Friday, July 26, 8 a.m.–noon

Expedited Excellence: What’s New That Can Make You Faster and Better

Joshua Austin, DDS, MAGD

As an editorial director for Dental Economics magazine, Dr. Joshua Austin is familiar to the dental community as the author of the “Pearls for Your Practice” column where he reviews and evaluates new products and technologies in the field. In this presentation, Dr. Austin will discuss current trends in dental materials and technologies, how materials have changed and evolved over the past few years, and how those changes affect dental procedures and practices. This fast-paced program will help catch everyone up to the dental materials and technologies of today’s dentistry.

At the conclusion of this lecture, participants will be able to:

- Explore how bulk-fill posterior composites compare to their traditional counterparts
- Discuss several placement techniques for bulk-fill posterior composites that save time
- Review universal adhesives and their advantages
- Explore the three etching techniques and their appropriate uses
- Review the current crop of cements on the market and which classes are superior
- Discuss when luting is an appropriate choice instead of bonding
- Explore many other products and items that can make your life easier and your dentistry faster

This presentation is appropriate for dentists, dental hygienists, dental assistants, dental students and administrative staff.

Joshua Austin, DDS, maintains a full-time restorative dentistry private practice in San Antonio. He is an editorial director and columnist for Dental Economics magazine, focusing on dental products and technology. Dr. Austin lectures around the country to study clubs and at dental meetings about these topics along with online reputation

management and social media. Dr. Austin is a graduate of the University of Texas Health Science Center at San Antonio Dental School and spent five years post-graduation as a faculty member in the Department of Restorative Dentistry. His approach to the “Pearls for your Practice” column is to provide an honest evaluation of a product based on his own real-world clinical use.

GENERAL INFORMATION

Event Location

Atlantic Sands Hotel and Conference Center
1 Baltimore Avenue, Rehoboth Beach, Delaware 19971
atlanticsandshotel.com

Parking

On-site parking at the Atlantic Sands conference location is available for Atlantic Sands guests only. Day attendees and guests of other hotels are responsible for securing alternative event parking options, if needed. For detailed parking suggestions, visit the Summer Dental Symposium event website at www.pcs.udel.edu/dental/location.

One complimentary parking space per room is provided for overnight guests at the Atlantic Sands Hotel and Conference Center.

Registration

Online—If you are paying with a credit card or check, register online at www.pcs.udel.edu/dental.

Fax—If you are paying by credit card, purchase order or government voucher, please fax registration form to 302-831-0701.

Phone—Have your credit card and course information ready, then call 302-831-7600, weekdays between 8:30 a.m. and 4:30 p.m.

Mail—Please see registration form. You may also download the registration form at www.pcs.udel.edu/dental.

Price

Symposium registration weekly rate is \$750 for dentists and \$375 for dental hygienists or other team members. The daily rate is \$225 for dentists and \$100 for dental hygienists or other team members. The student rate is \$80 for one day or multiple days.

The registration fee includes seminar instruction, course materials, certificates of attendance and continental breakfast each day. Participants assume responsibility for housing accommodations and all other meals.

Refund Policy

A full refund will be given for written cancellations received before July 15, 2019. No refunds will be given after this date. The University of Delaware is not responsible for any penalties or fees assessed as a result of cancellation or modifications of travel arrangements or hotel accommodations.

For More Information

If you have any questions about this conference, please contact Meghan Phelan at 302-831-3474 or mphelan@udel.edu.
